A new beginning – Federation and garden suburbs (c1900–c1940)

After the 1890s depression, the Federation era offered new hope and optimism and led to changes in social and economic circumstances. In Melbourne increasing prosperity and improved public transport meant that a suburban home became possible even for working class people. Nowhere was this more apparent than in the study area where Prahran and Malvern Councils came together in a remarkable act of civic co-operation to form the first and most successful of the municipal tramway authorities. The creation of the electric tram network during the first decades of the twentieth century made possible the ideal of suburban living that was realised in housing estates inspired by the garden city movement.

The City of Stonnington is also significant as a place that illustrates the changing ways that Australians lived during the twentieth century from mansions on large estates to shared accommodation and apartments. In a metropolitan (and even national) context, the City of Stonnington is notable as a place where some of the best twentieth century residential architecture was created. The City of Stonnington is also significant as a place that illustrates the changing ways that Australians lived during the twentieth century. It is particularly notable as one of the places where apartment living first gained wide acceptance prior to World War II.

The City of Stonnington also demonstrates the development of manufacturing in Victoria in the inter-war period. It is of note for the associations between the clothing industry and the development of Chapel Street into a shopping centre that drew shoppers from all over Victoria.

Creating a modern city – Motor cars and multi-cultural Melbourne (1940 onwards)

This City of Stonnington provides evidence of the rapid expansion and transformation of Melbourne in the post-war period as a result of State and Federal Government policies that, among other things, led to increased immigration, expansion of manufacturing and greater use of the motor car. Post-war development also reflects the policy of State Governments over many years to increase densities and the tensions that sometimes result when this conflicts with local community expectations.

The City of Stonnington and, in particular, Prahran and Windsor, was a place where many migrants, particularly those from Greece, settled and created new communities. This influx of settlers breathed new life into the inner city areas of Melbourne and contributed to the renaissance beginning in the 1970s that eventually encouraged young middle class residents to return.

The City of Stonnington is also of interest as an inner city suburb, which demonstrates the rise of community activism associated with the protection and conservation of places associated with both natural and cultural history. Some of the movements, for instance to save Gardiner’s Creek or against high-rise development, have had significant influence upon planning policy at both a local and state level.
11.4 Conclusion

The City of Stonnington has a rich and diverse natural and cultural heritage that illustrates the historic occupation, use, adaptation and development of the land since the arrival of Aboriginal people. This in turn promotes a greater understanding of the history of Victoria and Australia as a whole. This history is demonstrated in the City of Stonnington by a wide range of heritage places including buildings and structures, monuments, trees and landscapes, archaeological sites, and places with spiritual or symbolic meaning. Some of these places have been mentioned in this report, and there are many others besides. All have one thing in common:

These are places that are worth keeping because they enrich our lives – by helping us to understand the past; by contributing to the richness of the present environment; and because we expect them to be of value to future generations. (The Burra Charter: The Australia ICOMOS Charter for Places of Cultural Significance, 1999).

These places provide an insight into the complex cultural layering that gives the City of Stonnington a sense of historic continuity as well as a distinctive character. They reveal the way communities in the former Cities of Prahran and Malvern in past years thought about their local area as well as illustrating prevailing economic, social and political circumstances that were important in the development of the study area. In some cases the places and the people, uses and events associated with them had an even greater influence, extending to the whole of Melbourne, Victoria and sometimes Australia.

It is important that all aspects of this cultural layering are recognised and, where appropriate, protected and conserved to ensure that the history of the City of Stonnington as it is ‘written on the landscape’ can continue to be interpreted, understood and celebrated by the community now and in the future.

Cultural significance means aesthetic, historic, scientific, social or spiritual value for past, present or future generations. Cultural significance is embodied in the place itself, its fabric, setting, use associations, meanings, records, related places and related objects.

Conservation means all the processes of looking after a place so as to retain its cultural significance.

The Burra Charter is the short name given to the Australia ICOMOS Charter for Places of Cultural Significance, which was developed by Australia ICOMOS at a meeting in 1979 in the historic South Australian mining town of Burra. It is now widely accepted as the basis for cultural heritage management in Australia.

The Burra Charter may be applied to a wide range of places – an archaeological site, a town, building or landscape and defines various terms and identifies principles and procedures that must be observed in conservation work.

Although the Burra Charter was drafted by heritage professionals, anyone involved in the care of heritage items and places may use it to guide conservation policy and practice.

ICOMOS (International Council on Monuments and Sites) is a non-governmental professional organisation formed in 1965. ICOMOS is primarily concerned with the philosophy, terminology, methodology and techniques of cultural heritage conservation and is closely linked to UNESCO.

Place means site, area, land, landscape, building or other work, group of building or other work, and may include components, contents, spaces and views.

Post-contact means the period after first contact between indigenous and non-indigenous (sometimes referred to as ‘European’) individuals or communities.

RNE criteria are used to assess whether a place has significant cultural heritage values. A list is provided in Appendix 2.

SLHC The Stonnington Local History Collection, which can be accessed at the City of Stonnington website. This was the source of most of the images included in the study. The registration no. of each image is cited, as appropriate.

The study area is the whole of the City of Stonnington municipality. However, in documenting the history, the study may sometimes refer to places outside the study area that had an important influence on it.
AUSTRALIAN HISTORIC THEMES

1 TRACING THE EVOLUTION OF THE AUSTRALIAN ENVIRONMENT
The environment exists apart from being a construct of human consciousness. However, a thematic approach recognises the human factor in the natural environment, and how our understanding and appreciation of the environment has changed over time.

1.1 Tracing climatic and topographical change
1.2 Tracing the emergence of Australian plants and animals
1.3 Assessing scientifically diverse environments
1.4 Appreciating the natural wonders of Australia

2 PEOPLING AUSTRALIA
This theme group recognises the pre-colonial occupations of Indigenous people, as well as the ongoing history of human occupation from diverse areas.

2.1 Living as Australia’s earliest inhabitants
2.2 Adapting to diverse environments
2.3 Coming to Australia as a punishment
2.4 Migrating
2.4.1 Migrating to save or preserve a way of life
2.4.2 Migrating to seek opportunity
2.4.3 Migrating to escape oppression
2.4.4 Migrating through organised colonisation
2.4.5 Changing the face of rural and urban Australia through migration
2.5 Promoting settlement
2.6 Fighting for land
2.6.1 Resisting the advent of Europeans and their animals
2.6.2 Displacing Indigenous people

3 DEVELOPING LOCAL, REGIONAL AND NATIONAL ECONOMIES
While Geoffrey Blainey conceived of Australian history as dominated by the ‘tyranny of distance’ this concept is alien to Indigenous Australians. Eighteenth and nineteenth century developments in technology made it possible to link the continent to distant marketplaces, and the incentive for almost every expedition by the first European ‘explorers’ was the search for valuable resources. Much subsequent Australian history has revolved around the search for a staple on which to base regional economic development.

3.1 Exploring the coastline
3.2 Constructing capital city economies
3.3 Surveying the continent
3.3.1 Looking for inland seas and waterways
3.3.2 Looking for overland stock routes
3.3.3 Prospecting for precious metals
3.3.4 Looking for land with agricultural potential
3.3.5 Laying out boundaries
3.4 Utilising natural resources
3.4.1 Hunting
3.4.2 Fishing and whaling
3.4.3 Mining
3.4.4 Making forests into a saleable resource
3.4.5 Tapping natural energy sources
3.4.6 Tapping natural energy sources
3.5 Developing primary production
3.5.1 Grazing stock
3.5.2 Breeding animals
3.5.3 Developing agricultural industries
3.6 Recruiting labour
3.7 Establishing communications
3.7.1 Establishing postal services
3.7.2 Developing electric means of communication
3.8 Moving goods and people
3.8.1 Shipping to and from Australian ports
3.8.2 Safeguarding Australian products for long journeys
3.8.3 Developing harbour facilities
3.8.4 Making economic use of inland waterways
3.8.5 Moving goods and people on land
3.8.6 Building and maintaining railways
3.8.7 Building and maintaining roads
3.8.8 Getting fuel to engines
3.9 Moving goods and people by air
3.9.1 Integrating people into the cash economy
3.10.1 Assisting Indigenous people into the cash economy

3.11.5 Establishing water supplies
3.12 Feeding people
3.12.1 Using indigenous foodstuffs
3.12.2 Developing sources of fresh local produce
3.12.3 Importing foodstuffs
3.12.4 Preserving food and beverages
3.12.5 Retailing foods and beverages
3.13 Developing an Australian manufacturing capacity
3.14 Developing an Australian engineering and construction industry
3.14.1 Building to suit Australian conditions
3.14.2 Using Australian materials in construction
3.15 Developing economic links outside Australia
3.16 Struggling with remoteness, hardship and failure
3.16.1 Dealing with hazards and disasters
3.17 Inventing devices
3.18 Financing Australia
3.18.1 Raising capital
3.18.2 Banking and lending
3.18.3 Insuring against risk
3.18.4 Cooperating to raise capital (co-ops, building societies, etc.)
3.19 Marketing and retailing

APPENDIX 1
5 WORKING

Although a lot of what we call work is related to the economy, most of it is not undertaken for profit. A great deal of the work done in the home is neither paid nor counted as part of the national economy. Some of the most interesting recent social history written about Australia concerns work and workplaces.

5.1 Working in harsh conditions
5.1.1 Coping with unemployment
5.1.2 Coping with dangerous jobs and workplaces
5.2 Organising workers and work places
5.3 Caring for workers’ dependent children
5.4 Working in offices
5.5 Trying to make crime pay
5.6 Working in the home
5.7 Surviving as Indigenous people in a white-dominated economy
5.8 Working on the land

6 EDUCATING

Every society educates its young. While European education places a great emphasis on the formal schooling system, education encompasses much more.

6.1 Forming associations, libraries and institutes for self-education
6.2 Establishing schools
6.3 Training people for the workplace
6.4 Building a system of higher education
6.5 Educating people in remote places
6.6 Educating Indigenous people in two cultures

7 GOVERNING

This theme group is as much about self-government as it is about being governed. It includes all the business of politics, including hostility to acts of government.

7.1 Governing Australia as a province of the British Empire
7.2 Developing institutions of self-government and democracy
7.2.1 Protesting
7.2.2 Struggling for inclusion in the political process
7.2.3 Working to promote civil liberties
7.2.4 Forming political associations
7.3 Making City-States
7.4 Federating Australia
7.5 Governing Australia’s colonial possessions
7.6 Administering Australia
7.6.1 Developing local government authorities
7.6.2 Controlling entry of persons and disease
7.6.3 Policing Australia
7.6.4 Dispensing justice
7.6.5 Incarcerating people
7.6.6 Providing services and welfare
7.6.7 Enforcing discriminatory legislation
7.6.8 Administering Indigenous Affairs
7.6.9 Conserving Australian resources
7.6.10 Conserving fragile environments
7.6.11 Conserving economically valuable resources
7.6.12 Conserving Australia’s heritage
7.7 Defending Australia
7.7.1 Providing for the common defence
7.7.2 Preparing to face invasion
7.7.3 Going to war
7.8 Establishing regional and local identity
Australians are more likely to express their sense of identity in terms of a way of life rather than allegiance to an abstract patriotic ideal. One of the achievements of this society has been the creation of a rich existence away from the workplace. While some of the activities encompassed in this theme are pursued for profit—horse racing and cinema, for instance—their reason for being is the sheer enjoyment of spectators. While many people could not pursue careers in art, literature, science, entertainment or the church without being paid, those activities do not fit easily into the categories of economy or workplace.

8.1 Organising recreation
8.1.1 Playing and watching organised sports
8.1.2 Betting
8.1.3 Developing public parks and gardens
8.1.4 Enjoying the natural environment
8.2 Going to the beach
8.3 Going on holiday
8.4 Eating and drinking
8.5 Forming associations
8.5.1 Preserving traditions and group memories
8.5.2 Helping other people
8.5.3 Associating for mutual aid
8.5.4 Pursuing common leisure interests
8.6 Worshipping
8.6.1 Worshipping together
8.6.2 Maintaining religious traditions and ceremonies
8.6.3 Founding Australian religious institutions
8.6.4 Making places for worship
8.6.5 Evangalising
8.6.6 Running city missions
8.6.7 Running missions to Australia's indigenous people
8.7 Honours and achievement
8.8 Remembering the fallen
8.9 Commemorating significant events
8.9.1 Remembering disasters
8.9.2 Remembering public spectacles
8.10 Pursuing excellence in the arts and sciences
8.10.1 Making music
8.10.2 Creating visual arts
8.10.3 Creating literature
8.10.4 Designing and building fine buildings
8.10.5 Advancing knowledge in science and technology
8.11 Making Australian folklore
8.11.1 Celebrating folk heroes
8.11.2 Myth making and story-telling
8.12 Living in and around Australian homes
8.13 Living in cities & suburbs
8.14 Living in the country and rural settlements
8.15 Being homeless

9 MARKING THE PHASES OF LIFE

Although much of the experience of growing up and growing old does not readily relate to particular heritage sites, there are places that can illustrate this important theme. Most of the phases of life set out below are universal experiences.

9.1 Bringing babies into the world
9.1.1 Providing maternity clinics and hospitals
9.1.2 Promoting mothers’ and babies’ health
9.2 Growing up
9.2.1 Being children
9.2.2 Joining youth organisations
9.2.3 Being teenagers
9.2.4 Courting
9.3 Forming families and partnerships
9.3.1 Establishing partnerships
9.3.2 Bringing up children
9.4 Being an adult
9.5 Living outside a family/partnership
9.6 Growing old
