Dear \_\_\_\_\_

### **City of Stonnington Apartment Composting Program**

Our local Council, the City of Stonnington, is offering a program to support the establishment of an onsite shared worm farm/composting system within the grounds of our apartment building.

Recycling food waste reduces waste to landfill (food waste breaking down in landfill creates methane, a highly potent greenhouse gas) and also creates valuable fertiliser for our plants and gardens. Participating apartment buildings will be provided with up to 3 fully subsidised (FREE) worm farms/composting systems, an onsite or online workshop and ongoing access to information and support from Council.

I would like to apply for our building to participate in this program. I need signatures of support from 30% of the apartments in this building to submit the application. I will also need to obtain signed support from our Owners Corporation.

The Hungry Bin worm farms and Green Cone solar composters used in the program are low odour, have no risk of rodents and disease and take up limited space.

Everyone would be welcome to participate by adding their food scraps but it's totally up to you if you do!

If you are happy to support my application for our building to participate in this program, please fill in the slip below and return to \_\_\_\_\_ by \_\_\_\_\_.

Feel free to ask me for more information about the Apartment Composting Program or visit [Council's website](#).

Yours sincerely

\_\_\_\_\_
